

|   |                     |
|---|---------------------|
| Sprint 13   | 01/30/23 - 02/05/23 |
| <b>Notes:</b>   | Name                |
|   |                     |
| <b>What went right:</b>   |                     |
| user management low level designs   | josh                |
| follow the action plan from last week to get at least 1hr of work a day           | frank               |
| transfer everything related to scrum on to docs                                   | joseph              |
|   |                     |
|   |                     |
|   |                     |
|   |                     |
| <b>Wthat went wrong:</b>  |                     |
| task is not really distributed well enough  | rhoy, ghabe         |
| didnt know what task to do or task to pick up                                     | rhoy, ghabe         |
| after task break down, no formal proof and should have confirmation               | josh                |
|   |                     |
|   |                     |
|   |                     |
|   |                     |
| <b>Action plan:</b>   |                     |
| Have a task break down after sprint retrospective so that task can be distributed | ghabe               |
| david split some of other the work to rhoy because rhoy has extra capacity        | david               |
| After task break down to respond and have confirmation                            | josh                |
