

Sprint 23 (04/10/23 - 04/16/23)

1. Is there anything blocking you?
2. What did you do yesterday?
3. What are you going to do today?

Date	Joseph	Frank	Josh	Rhoy	Ghabe	David	Notes
@April 10, 2023	1. No 2. Attempted prototype 3. Finalize LLD	1. No 2. Finished up some drafts 3. Finish remaining LLDs	1.No 2.Worked on Alerts 3.Finish Alerts	1. Yes debugging 2. Introduced reputation parameters in DAO 3. Debug code in order to proceed further with implementation			
@April 11, 2023	1. No 2. finalize half of the success cases and figma views 3. finalize events LLD and push to git to be peer reviewed	1. No 2. Finished up failure cases 3. Clean up designs and push to github	1.No 2.Worked on Alerts frontend 3.Try to finish Alerts	1. No 2. Debugged DAO functions that can send and retrieve data to/from dbo.Reports 3. Finish implementing 1a/1b use cases and create a unit test		1. No 2. Refactored Code 3.Finish File Upload Design	
@April 12, 2023	1. No 2. Finished LLD and pushed to git 3. start and take notes on picture up load LLD	1. No 2. Finished LLDs, pushed to github 3. Start fixing aws issue	1.Yes,midterms 2.Worked on Alerts 3.Will start on peer review	1. No 2. Almost finished implementing 1a/1b success case in the backend 3. Finish implementing the case in the backe	1. No 2. Nothing 3. Implement dependency injection on account controller	1.Yes other classwork 2. Finish File Upload Diagrams 3. Nothing	

Date	Joseph	Frank	Josh	Rhoy	Ghabe	David	Notes
@April 13, 2023	1. No 2. Took notes on Picture Upload 3. Come up with recommendations for design	1. Yes, aws issue 2. Tried fixing aws 3. I'm a bit at a loss for the aws, I'm going to pivot today and adjust some of the burndown charts for starters	1.No 2.Looked over Service Creation 3.Peer review Service Creation	1. No 2. Finished implementing 1a/1b in the backend 3. Start on Peer review and add validations on the backend	1. No 2. Account controller dependency injection refactor 3. Finish account controller refactor	1.Yes other classwork 2. Nothing 3. Nothing	Discussion on Frank being bloc potential idea would probably refactor inside our front end code where replace the url to our host name instead of hard coded local host So something like https://test.verification/account/register - Joseph Potentially something can be uncovered with monday's lecture, there would only be one day to implement - Josh
