Sprint 24 (04/17/23 - 04/23/23)

1. Is there anything blocking you?
2. What did you do yesterday?
3. What are you going to do today?

Date	Joseph	Frank	Josh	Rhoy	Ghabe	David	Notes
@April 17, 2023	1. No 2. Worked on manager layer and basic unit test 3. Work on service layer and complete 1 integration test	1. No 2. Worked on some research for frontend of feature 3. Start implementation with setting up tests	1.No 2.Worked on Alerts 3.Work on Account Deletion	1. No 2. Started on Controller and "View Reports" Functionality 3. Finish "View Reports" Functionality		1. No 2. Finished AWS S3 Get 3. File Upload Implementation Backend	Untitled
@April 18, 2023	1. No 2. Integration test 3. Check for authorization or just move on to incrementing count for joining	1. No 2. Got the test and database elements blocked out 3. Create data access layer and build stored procedures for database		1. No 2. Finished "View Reports" Functionality in the backend 3. Create backend integration tests and start on frontend		1. Yes other classwork 2. File Upload backend 3. Nothing	Untitled
@April 19, 2023	1. No 2. joining/unjoin event, count constaints 3. work on Ui for events			1. No 2. Started on reputation frontend 3. Learn how to make stars and try to implement it today	1. Yes 2. User Account dependency injection refactor 3. Other class project	1. No 2. Nothing 3. File Upload UI for Pins	Untitled

Date	Joseph	Frank	Josh	Rhoy	Ghabe	David	Notes
@April 20, 2023	1. No 2. profile events view & worked on creating an admin view. pushed refactored front-end on to integration branch 3. Updating title and description, deleting an event & testing & hopefully push to setting up a controller	1. No 2. Finished up most of back-end for the service creation 3. Finish the back-end for service requests and get the testing for it finished as well	1.No 2.Worked on Account Deletion 3.Work on Alerts	1. No 2. Created user reports/reputation view 3. Create "report creation" view and create tests		1. No 2. File Upload Frontend 3. Finish File Upload for Pins	Untitled

Date	Joseph	Frank	Josh	Rhoy	Ghabe	David	Notes
@April 21, 2023	1. No 2. Worked on integration test, service layer, manager layer and data access layer 3. Finish remaining integration test, set up controller, work on front end	1. No 2. Worked on service layer and manager layer, got some unit tests working 3. Finish up stored procedures, get a flow from manager to database for each method. Get all backend testing done. If possible start setting up frontend so it will be able to connect with controller		1. No 2. Finished "reports/reputation" view 3. Create "create a report" view and implement axios stuff	1. No 2. Depedency Injection refactor 3. Finish dependency injection refactor for integration	1. Yes other classwork 2. Finish File Upload for Map 3. Nothing	Frank - @David Do you think you are on track to complete your sprint goal with a day off? David - @Frank I still have to do profile and tests. not too bad but still a couple days of work Frank - @David Okay, as long as you think you can get it done before like 8am on Monday. David - @Frank yeah i just have a paper due today
