sprint 16

Sprint 16 Retrospective:

Notes:

What went right:

- able to get views done and accomplish recommendation on wed: joseph

- get the integration to work: josh

- able to get low level design for map: ghabe

What went wrong:

- took along time on JS

- change plan mid way through sprint: David

- task break down not 100% accurate: frank

- didnt follow scrum, 2 daily stand up, task breakdown and log hours: ghabe

- other class work to do: josh

Action plan:

- communication could have prevented repeating any task / sharing: joseph

- have a visual granular task/ see what people are doing: joseph

- push to git more often at the same time when logging hours ~11pm: josh

- ask questions in the beginning so that so we catch changes earlier in the spring: david

- research sprint moving forward should have a task break down: joseph
