Sprint 19

Sprint 19 Retrospective:

Notes:

- Have not been consistent in doing the daily stand ups: ghabe & josh

What went right:

- some JWT research is done: ghabe

- almost finished with the backend: david

- doing design help in learning alot: rhoy

- have rds to ec2 instance: frank

- able to get html / css views for analytics: joseph

What went wrong:

- Got lazy and did not get much research done: ghabe

- still not done and have general questions on overall system: rhoy

- cannot get backend and frontend on IIS to have them communicate and internet going in and out that prevented getting work done: frank

- was not able to apply charting on the frontend: joseph

Action plan:

- implement the charting for analytics on to next sprint: joseph

- re-balance by getting more work early in the sprint, and atleast get 1hr of work on monday: frank

- stay within -5% to +5% on completeness trendchart: ghabe
